

Community Behavioral HealthCare Network of Pennsylvania

CBHNP Introduces . . .

ProviderConnect®

Effective **September 1, 2007**, we are pleased to introduce the implementation of a web based application which will allow providers within the CBHNP network to:

- Review approved authorizations
- Check the status of claims
- Review provider profile and site locations

This application includes functionality which enables users to access real time information 24 hours a day, 7 days a week.

Provider agencies must register in order to use ProviderConnect®. In addition, each individual user within the agency must be registered. Registration forms and agreements can be found at www.cbhnp.org.

A Trainer and a Point of Contact must be identified within each agency. Those individuals will handle the day to day ProviderConnect® within each provider agency. In the event, issues cannot be resolved by these individuals, e-mail inquiries may be sent to providerconnect@cbhnp.org.

Additional phases are planned to:

- Permit claims entry
- Permit authorization request entry
- Automate various manual processes currently in place
